

Ottemeier

Perfection, when
it matters most.

Ottemeier Tooling and
Machine Technology

Companies have to be versatile to ensure success on the national and international markets these days. Due to technical progress, growing economical pressure and not least, the ever growing new demands from customers and consumers, manufacturing companies are facing new and more complex challenges.

As a specialist in the development and realisation of high-performance machinery and system solutions, we support those companies who are willing to meet these challenges. Our staff develop future-oriented solutions, with which our customers can sustainably increase their capacity, productivity and competitiveness.

New perspectives
using ideas and
insight.

Whether manual devices or fully automatic production facilities, either as the production of special tools or the manufacture of prototypes and small series – with over 50 years of experience in flexible, creative and innovative technology within customised machine engineering and tool manufacturing – we are there for you, when it matters most.

Perfection, when it matters most.

Key figures:

- Founded by Rudolf Ottemeier in 1958
- 70 employees
- 7,750 m² of production and hall space

performance.

fer a large range of services, which goes far beyond the classical customised machine and tool engineering. The main focus of our work is not only the development and implementation of customised machines but also tool manufacturing and contract work.

plans: with complete solutions from a single partner.

Quality for the future: all from a single partner

Through our employees' know-how, we are able to respond quickly and to understand precisely the production processes and specific requirements our customers need. Our own research and development team develop solutions, which are then directly implemented at our facility. In addition to the maximum in quality, reliability and punctuality, our customers can be certain to have a comprehensive service ranging

from consulting to development all the way to installation and commissioning. We are there for you, when it matters most.

The same naturally applies to quality management and environmental safety. As early as 2001, Ottemeier was one of the first in its branch to be certified in accordance with ISO 9001. We continuously invest in the improvement of

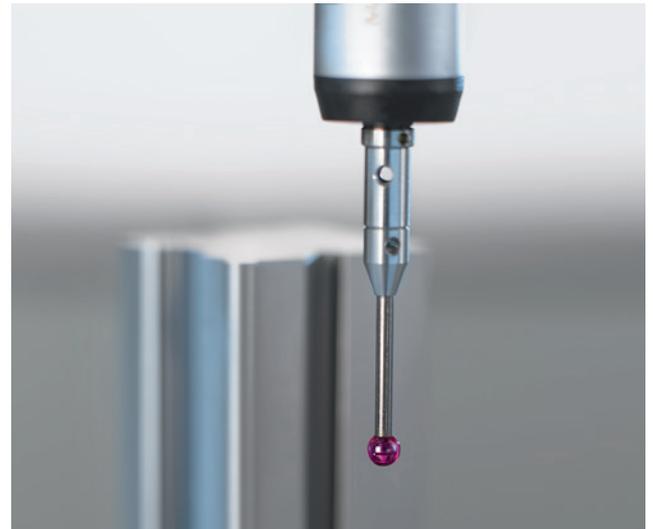

quality and productivity within all our operating areas.

All the company's procedures are incorporated in a high-performance environmental management system (ISO 14001). Here, particular emphasis is placed on the qualification of our staff: due to our above-average advanced training rate, the best requirements for a successful future are created.

Customised machine engineering and tool manufacturing

Within this business area, we offer special solutions for modern production facilities with the focal point on the furniture, construction and automotive industries. The focus is placed on the modern automated processing of roll forming profiles especially within the areas of pressing and handling – ranging all the way from the raw material to the finished part.

Contract work

Whether contract milling, contract measuring or contract EDM manufacturing – we offer convincing economical, technical and logistical alternatives to in-house production. In the production of individual parts and small series, as well as in high-precision measurement of components, state-of-the-art machines and highly trained staff guarantee the distinctive Ottemeier high level of quality.
